ASGROW® SOYBEANS ARE CONSTANTLY INNOVATING — JUST LIKE THE FARMERS WHO GROW THEM

Farmers who plant Asgrow® soybeans have many reasons to feel confident, including the fact that Asgrow is constantly innovating to increase soybean yields and bring farmers the most advanced soybean products in the marketplace.

Asgrow combines the most exclusive, high-performing genetics, the innovative trait technology and the next-generation seed treatment products that add up to higher yield potential at harvest. Today, farmers are taking their soybean yields to a higher level with Asgrow brand Genuity™ Roundup Ready 2 Yield® soybeans.

Asgrow is a leading provider of Genuity™ soybeans featuring the Roundup Ready 2 Yield trait and Acceleron™ seed treatment products. Developed through advanced gene mapping and insertion to identify the specific region of DNA associated with higher yield, Asgrow Genuity™ Roundup Ready 2 Yield produces higher yield potential. In fact, many farmers across the Midwest have reported finding not only abundant clusters of 4-bean pods – but also 5-bean pods in their fields.

Delivering Real Results to the Farmers Who Plant It

“I’m really excited about my Asgrow Genuity™ Roundup Ready 2 Yield soybeans. This new technology is just amazing. I’m seeing consistent 4-bean pods, great standability and impressive yield potential. With the way things look as we head into harvest, I’m hoping for 70-bushel-per-acre soybeans.”

Adam Edwards, Virden, Illinois

“We were seeing lots of 4-bean pods with Asgrow Genuity™ Roundup Ready 2 Yield, but we were still surprised to find a 5-bean pod. We’ve been planting Asgrow brand soybeans for 25 years, and I believe this will be the best crop we have ever had.”

Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.
