

MORE FARMERS GET MORE PERFORMANCE FROM THEIR SEED CHOICE

Farmers like Billy and Tammy Clay are confident in their decision to plant the DEKALB® brand for its superior performance, advanced technology and proven yield advantage.

Three reasons why more farmers are planting more DEKALB corn.

“DEKALB® corn has more than exceeded our expectations.”

Tammy Clay works alongside her husband, Billy, and two of their children every day at 4 Clay Partnership in Rayville, Louisiana.

“We’re in the South, so we have plenty of insect pressure,” Tammy states. The Clays count on the DEKALB brand for the latest Genuity™ trait technologies to help them with this challenge. They also count on DEKALB corn to dry down faster than other brands. In mid-August, they were able to harvest several weeks before some of their neighbors. And as they

harvested, their yield monitor read an amazing 290 bushels per acre in some places.

“We couldn’t believe it at first,” Tammy says. “We have many reasons to be pleased with DEKALB.”

A handwritten signature in black ink that reads "Tammy Clay".

DEKALB brand corn is proud to be a leading provider of Genuity™ technology traits. Visit DEKALB.com

Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.
