

MORE FARMERS HAVE MORE CONFIDENCE IN THEIR SEED CHOICE

Farmers like Gerald Tumbleson are confident in their decision to plant the DEKALB® brand for its superior performance, advanced technology and proven yield advantage.

Three reasons why more farmers are planting more DEKALB brand corn.

❖❖❖ **"We've increased our DEKALB® acres every year because of yield and drydown."**

Gerald Tumbleson farms with his sons, Trace and Trent in southern Minnesota, where they have been planting DEKALB corn for the last 12 years. Years ago, they planted a large majority of their acres to another brand, but "drying corn costs too much," Gerald says. "We plant DEKALB for the drydown."

Tumbleson Farms also counts on the DEKALB brand for superior breeding. "DEKALB stays on top of genetics and

biotechnology," Gerald says. "Now we can plant corn in higher populations with better drydown and higher yield."

"The DEKALB corn on our farm this year looks good. Every stalk has an ear, and it's filled up to the tip."

Gerald Tumbleson, Sherburn, Minnesota
