

MORE FARMERS HAVE MORE CONFIDENCE IN THEIR SEED CHOICE

Farmers like Ryan Robinson are confident in their decision to plant the DEKALB® brand for its superior performance, advanced technology and proven yield advantage.

Three reasons why more farmers are planting more DEKALB.

❖❖❖ **“Last year, DEKALB® yielded 15–30 bushels per acre more than a competing seed brand in each of the four plot trials we planted it in. This year, we switched all of our corn acres to DEKALB.”**

Recent Ohio State University graduate Ryan Robinson has been running the combines on Robinson Grain Farms since he was six years old. He officially began farming with his father, Keith, two years ago. Last year, the father-and-son team switched 100 percent of its corn acres to DEKALB.

“With the other brand, we had extremely high moisture corn and were running our dryers for seven to eight hours at a time –

our gas bill was outrageous,” Ryan recalls. “Our neighbors with drier corn were all planting DEKALB.”

“We began planting DEKALB because it dries down quicker and it yields better.”
